Note from the Serpentine Galleries Artistic Director

The realisation of the Serpentine Pavilion 2019 is only possible because of the enormously generous contribution of individuals, companies and foundations that have pledged sponsorship, or help in-kind, to the project. The Serpentine has no budget for this annual architecture commission and must raise all the funds to make the scheme a reality.

We would be very grateful if you could acknowledge in print and online the Pavilion’s principal supporters in your coverage of the project:

Press Release

SERPENTINE PAVILION 2019, DESIGNED BY JUNYA ISHIGAMI
21 June – 6 October 2019
Sponsored by Goldman Sachs

‘A stone creates a landscape, and a landscape usually sits outside of a building. I wanted to create this landscape that exists outside, inside the building itself.’ Junya Ishigami

The Japanese architect Junya Ishigami, celebrated for his experimental structures that interpret traditional architectural conventions and reflect natural phenomena, has been selected to design the Serpentine Pavilion 2019.

Ishigami’s design takes inspiration from roofs, the most common architectural feature used around the world. The design of the 2019 Serpentine Pavilion is made by arranging slates to create a single canopy roof that appears to emerge from the ground of the surrounding Park. Within, the interior of the Pavilion is an enclosed cave-like space, a refuge for contemplation. For Ishigami, the Pavilion articulates his ‘free space’ philosophy in which he seeks harmony between man-made structures and those that already exist in nature.

Describing his design, Ishigami said: ‘My design for the Pavilion plays with our perspectives of the built environment against the backdrop of a natural landscape, emphasising a natural and organic feel as though it had grown out of the lawn, resembling a hill made out of rocks. This is an attempt to supplement traditional architecture with modern methodologies and concepts, to create in this place an expanse of scenery like never seen before. Possessing the weighty presence of slate roofs seen around the world, and simultaneously appearing so light it could blow away in the breeze, the cluster of scattered rock levitates, like a billowing piece of fabric.’

Junya Ishigami (b. 1974) worked as an architect at SANAA before founding the prize-winning Junya Ishigami + Associates in 2004. Winner of the Golden Lion award at the Venice Biennale of Architecture in 2010, he was the subject of a major and critically acclaimed solo exhibition at the Fondation Cartier pour l’art contemporain in 2018 that is traveling to the Power Station of art in Shanghai later this year. He is known for designs with dream-like qualities that incorporate the natural world, such as landscapes, forests and clouds, in an architectural practice that places humankind as part of nature.

He is the nineteenth architect to accept the invitation to design a temporary Pavilion on the Serpentine Gallery’s lawn in Kensington Gardens. This pioneering commission, which began in 2000 with Zaha Hadid, has presented the first UK structures by some of the biggest names in international architecture. In recent years it has grown into a highly-anticipated showcase for emerging talent, from Frida Escobedo of Mexico to Francis Kéré of Burkina Faso and Bjarke Ingels of Denmark, whose 2016 Pavilion was the most visited architectural and design exhibition in the world.
Serpentine Galleries Artistic Director Hans Ulrich Obrist and former CEO Yana Peel selected this year's architect with advisors Sir David Adjaye OBE, Richard Rogers and David Glover alongside Julie Burnell (Head of Construction and Buildings, Serpentine Galleries) and Amira Gad (Curator, Exhibitions and Architecture, Serpentine Galleries).

The Serpentine Pavilion 2019 is supported by Goldman Sachs for the fifth year.

**Serpentine Galleries Artistic Director Hans Ulrich Obrist said**: ‘Junya Ishigami's Serpentine Pavilion – a gravity-defying structure informed by the natural world – succeeds in inspiring the imagination of what is possible in architecture. The Pavilion and its accompanying programme will be central to the Serpentine's General Ecology strand – an ongoing investigation into complex systems, interspecies landscapes and the environment. Alongside this year’s Pavilion, we are thrilled to simultaneously launch Serpentine Augmented Architecture, with Google Arts & Culture, where the winning submission by Jakob Kudsk Steensen, *The Deep Listener*, from July 11th will be on display. Both projects bring to life a brilliant conjunction of experiments in technology and creative vision. We hope all visitors, of all ages will enjoy the spaces as we continue in our mission to bring art and architecture to the widest audiences.’

**Richard Gnodde, CEO of Goldman Sachs International, said**: ‘Goldman Sachs is delighted to be partnering with the Serpentine Galleries for the fifth year running and we look forward to seeing Junya Ishigami’s fascinating Pavilion come to life in Kensington Gardens this summer. 2019 marks the 150th anniversary of our firm and we are very proud to continue our long-standing commitment to innovation and creativity through this exceptional project in the heart of London.’

**Summer at the Serpentine**

The Serpentine Pavilion 2019 will once again be a platform for COS x **Serpentine Park Nights**, the Serpentine’s annual programme of experimental and interdisciplinary evenings that takes place on selected Fridays. Practitioners in the fields of art, architecture, music, film, theory and dance have been commissioned to create new, site-specific works in response to Ishigami’s design, offering unique ways of experiencing architecture and performance. **Recipes for Change** on selected lunchtimes, invites community groups, artists, activists, writers and architects to form connections through food inspired by the ideas behind the Pavilion design. The **Architecture Family Pack and Programme**, sponsored by COS, will give children and their families the chance to explore the Serpentine Pavilion from playful and original perspectives.

This year, alongside the Pavilion, the Serpentine presents Jakob Kudsk Steensen’s *The Deep Listener*, an augmented reality installation that immerses visitors within the complex ecosystems that circulate around the Serpentine Galleries park setting. Kudsk Steensen was selected from over 350 entrants as the first Serpentine **Augmented Architecture** commission, a global open call for new forms of architecture in the field of advanced technologies. Serpentine Augmented Architecture in collaboration with Google Arts Culture and Sir David Adjaye OBE. [augmentedarchitecture.org](http://augmentedarchitecture.org)
The design for the 2019 Serpentine Pavilion takes roofs, the most common architectural feature, as its point of departure and inspiration. It is reminiscent of roofing tiles seen around the world, bridging both architectural and cultural references through this single architectural feature. The roof of the Pavilion is made by arranging slates to create a canopy that alludes to nature. It appears to emerge from the ground of the surrounding Park.

My design for the Pavilion plays with our perspectives of the built environment against the backdrop of a natural landscape, emphasising a natural and organic feel as though it had grown out of the lawn, resembling a hill made of rocks. This is an attempt to supplement traditional architecture with modern methodologies and concepts, to create in this place an expanse of scenery like never seen before. Possessing the weighty presence of slate roofs seen around the world, and simultaneously appearing so light it could blow away in the breeze, the cluster of scattered rock levitates, like a billowing piece of fabric.

The interior of the Pavilion is an enclosed cave-like space, a refuge for contemplation. For me, the Pavilion articulates a ‘free space’ philosophy that is to harmony between man-made structures and those that already exist in nature.

Junya Ishigami
February 2019
Serpentine Pavilion 2019
Fact Sheet

Dates
• 21 June – 6 October 2019

Overall site area
• 541sqm

Gross internal area
• 350sqm

Dimensions of Pavilion
• The shape of the roof is triangular on plan, with the points of the
  triangles orientated towards the North-East, South and North-West. The
  edges of the roof are 30m long, varying slightly along each
  aspect.

Footprint
• 350sqm: Building footprint

Heights
• 4.6m: Max overall height
• 4.5m: Max internal ceiling height
• 2.1m: Min internal useable ceiling height
• 2.0m-0m: Min height (unusable)

Structure and materials
• The roof supporting structure is formed from an orthogonal
  mesh/grillage of steel, spanning between pin-ended columns
  connected directly to the substructure.
• The top surface of the roof is clad with 61 tonnes of Cumbrian Slate
  tiles, arranged to provide a water resisting surface and a varying
  texture to create architectural interest. The tiles take support from,
  and are fixed to, the grillage of steel under.
• The roof takes support from a ‘forest’ of pin-ended columns, arranged
  on a random grid. The three corners of the Pavilion are braced to
  provide lateral stability in both directions to the roof.
• 16 tonnes of primary steel
• 106 steel columns
• The Pavilion is founded on a platform of in situ concrete with a
  trowelled finish.
• The Pavilion has two exits, one on the west facing side of the Pavilion
  and one on the south. Level access is provided for all exits so that
  mobility-impaired occupants are able to exit the Pavilion unaided. The
  maximum distance to an exit is 19 metres.
• The Pavilion is open daily 10am-6pm
• The café services are to be located in the interior of the Pavilion.
• COS x Serpentine Park Nights, a programme of talks, films and
  performances, takes place on selected Friday nights.
• Recipes for Change, a lunchtime programme of events takes place on
  selected Thursdays.
• Family Weekends will take place in the Pavilion during the summer.

Serpentine Pavilions
2000 – 2018
Key Facts

Each summer the Serpentine invites an internationally renowned architect to create his or her first built structure in England. The Pavilion commission has become an international site for architectural experimentation and has presented projects by some of the world's greatest architects. The selection, made by Serpentine Artistic Director Hans Ulrich Obrist and former CEO Yana Peel, Julie Burnell, Head of Buildings and Construction, and curator Amira Gad together with advisors Sir David Adjaye and Richard Rogers, is led by the Serpentine's core curatorial thinking. The aim is to choose architects who consistently extend the boundaries of contemporary architectural practice and to introduce these practitioners to wider audiences.

The architectural brief is to design a 300-square-metre Pavilion that is used as a café and meeting space by day and a forum for learning, debate and entertainment at night. Since its inception, the Pavilion has become an established home for the Serpentine's experimental public programmes. There is no budget for the project: it is realised through sponsorship, in-kind support and the sale of the Pavilion. The commission was first conceived by former Serpentine Galleries Director, Julia Peyton-Jones, in 2000, with Zaha Hadid, who designed the inaugural Pavilion.

• The annual Serpentine Pavilion Commission is the first initiative of its kind worldwide and has resulted in 19 temporary buildings for London.

• The Pavilions are landmark temporary structures designed by internationally renowned architects who have not yet completed a structure in the England (at the time of their invitation).

• Each Pavilion project takes a maximum of six months from commission to completion.

• Serpentine Pavilion architects to date: Frida Escobedo, 2018; Francis Kéré, 2017; Bjarke Ingels Group (BIG), 2016; selgascano, 2015; Smiljan Radić, 2014; Sou Fujimoto, 2013; Herzog & de Meuron and Ai Weiwei, 2012; Peter Zumthor, 2011; Jean Nouvel, 2010; Kazuyo Sejima and Ryue Nishizawa of SANAA, 2009; Frank Gehry, 2008; Olafur Eliasson and Kjetil Thorsen, 2007; Rem Koolhaas and Cecil Balmond Arup, 2006; Álvaro Siza and Eduardo Souto de Moura with Cecil Balmond, Arup, 2005; MVRDV with Arup, 2004 (unrealised); Oscar Niemeyer, 2003; Toyo Ito with Arup, 2002; Daniel Libeskind with Arup, 2001; Zaha Hadid, 2000. In 2016, the Serpentine presented four Summer Houses alongside the Serpentine Pavilion, designed by architects: Kunlé Adeyemi, Barkow Leibinger, Yona Friedman and Asif Khan.
Serpentine Pavilions 2000 – 2018

Serpentine Pavilion 2018
Designed by Frida Escobedo

In recent years the Serpentine Pavilion has been an important stepping stone for young architects: half calling card, half official seal of approval. But few have deployed such an impressive, powerful palette of chiaroscuro and ephemerality. It is to be hoped that it brings her the recognition and opportunity she deserves.

The Times

Serpentine Pavilion 2017
Designed by Francis Kéré

It is an enigmatically crafted poem to the architect’s homeland. But, at a difficult time for the capital, it also forms a vibrant architectural lens through which we can reaffirm the cultural internationalism that is central to London's enduring character and spirit.

Building Design

Serpentine Pavilion 2016
Designed by Bjarke Ingels Group (BIG)

One of the most compelling contributions to the series so far. One-thousand eight-hundred and two of these specially developed units have been stacked together, lending the Pavilion's billowing surfaces an elegantly pixelated effect.

The Telegraph

Serpentine Pavilion 2015
Designed by selgascano

The playful plastic structure heading for the Serpentine will bring a welcome dose of mischief, and a secret stained-glass corridor, to London...it looks as if an exotic caterpillar might have nibbled on a magic mushroom before spinning its chrysalis.

The Guardian
Serpentine Pavilion 2014
Designed by Smiljan Radić

The pavilion has become a quintessential part of the London summer scene, one of the rare moments when architecture is presented, unmediated, to a public who seem consistently – and increasingly – interested.
Financial Times

Serpentine Pavilion 2013
Designed by Sou Fujimoto

His ultra-delicate 'steel cloud' of slender white-painted rods, acrylic and glass is one of the best examples for years.
RIBA Journal

Serpentine Pavilion 2012
Designed by Herzog & de Meuron and Ai Weiwei

They have created what turns out to be one of the most compelling, most eccentric and most engaging Pavilions so far... Its theatricality makes it a stunning set, as well as a clever meditation on memory (and) on the consumption of the architectural image.
Financial Times

Serpentine Pavilion 2011
Designed by Peter Zumthor

At the heart of Peter Zumthor’s Pavilion was a garden he hoped would inspire visitors to become observers. Zumthor said his design aimed, “to help its audience take the time to relax, to observe and then, perhaps, start to talk again.”
Dezeen

Serpentine Pavilion 2010
Designed by Jean Nouvel

Never mind Wimbledon, Ascot or Glyndebourne, it’s the annual Serpentine Pavilion that tells you it’s summer season in the art world. This year’s architectural encumbent is Jean Nouvel and a spiffing strawberry-red confection.
Time Out
Serpentine Pavilion 2009
Designed by Kazuyo Sejima and Ryue Nishizawa of SANAA

The Serpentine Gallery really comes into its own in the summer, with its annual architectural extravaganza, a temporary pavilion. This year’s floating aluminium roof curves its beautiful way through the trees and shrubs on the site, looking like a meandering stream or a trail of smoke.

Wall Street Journal

Serpentine Pavilion 2008
Designed by Frank Gehry

Having commissioned such figures as Rem Koolhaas, Zaha Hadid and Daniel Libeskind in years past, Gehry’s name completes a straight flush of the most feted international architects of the day.

Daily Telegraph

Serpentine Pavilion 2007
Designed by Olafur Eliasson and Kjetil Thorsen

The seventh Serpentine Gallery Pavilion is a delightful and beautifully thought-out game. Often, in recent decades, art has been applied to architecture like a form of makeup. The Serpentine Gallery must be applauded for joining in this high game and nurturing a pavilion that deserves to be popular, and with its “laboratories”, truly creative.

The Guardian

Serpentine Pavilion 2006
Rem Koolhaas with Cecil Balmond – Arup

A helium roof that rises and falls with the weather? Rem Koolhaas’s Serpentine Pavilion is a joyous extravaganza.

The Guardian
**Serpentine Pavilion 2001**
**Designed by Daniel Libeskind with Arup**

Architect Daniel Libeskind was commissioned to create this amazing, folded aluminium-clad structure on the Serpentine Gallery's lawn.

*Evening Standard*

**Serpentine Pavilion 2002**
**Designed by Toyo Ito with Arup**

Daring, provocative, inspired… London's Serpentine Gallery has won rave reviews for its previous temporary summer pavilions… this year's design, by leading Japanese architect Toyo Ito, will be no exception.

*The Independent*

**Serpentine Pavilion 2003**
**Designed by Oscar Niemeyer**

The Pavilion is also Niemeyer's first work in this country, making amends for the loss of examples of others from the great period to which he belongs. This is a beautiful building, a modern architectural gem.

*The Times*

**Serpentine Pavilion 2005**
**Álvaro Siza and Eduardo Souto de Moura with Cecil Balmond – Arup**

The temporary pavilion has become unmissable, a rare opportunity to view the work of the finest international architects at first hand. This is how architecture should be exhibited and remembered. See it, and Siza's exquisite space will stay with you.

*Financial Times*
Serpentine Pavilion 2000
Designed by Zaha Hadid

The first pavilion was created to shelter a fundraising dinner to celebrate the gallery's 30th anniversary. Its aim was to "radically reinvent the accepted idea of a marquee". A folded triangulated structure rose and fell to define different internal spaces and vary the degree of openness. Inside were ranks of angular tables, in shades graded from pale to dark grey.
The Observer
Creating a carpet of rock erupting from and merging closely with the surrounding landscape has been Junya Ishigami’s over-arching vision for his Serpentine Pavilion. As technical advisors, AECOM’s role was to bridge the gap between the client and architect, contributing a range of expertise to develop the design that celebrates the conceptual vision whilst at all times maintaining the balance between a strict technical brief and evolving architectural intent.

The architect has described taking his inspiration for the Pavilion from the traditional stone roof - a dominant feature of Japanese architecture. Ishigami created a free-form organically shaped expanse of Cumbrian slate, lifted from the ground on a ‘forest’ of slender steel columns seeming to push the ‘rock carpet’ skyward. To achieve Ishigami’s vision of an ‘unstable’ structure holding up the heavy layers of metamorphic rock as though it was weightless, the size and profile of the structural steel frame was rationalised to the extent that it is nearly six times lighter than the 60 tonne slate it supports.

To keep up with the six-month design and construction programme in parallel to the evolving architectural form, AECOM used its full suite of digital design tools to enhance the ‘hands on’ approach to the design. The digital solutions allowed for the architect to accurately build physical scale models in his workshop in Japan and explore further iterations to the overall design. This process was supported throughout by the contractor, Stage One, undertaking the build of sample sections of the roof using the expertise of a highly-skilled team of traditionally trained stonemasons. This enabled the team to quickly resolve remaining design and buildability issues that could not be easily achieved digitally.

The organic shape of the Pavilion was in itself a technically challenging proposition. A number of constraints, including the architectural vision, client brief, material availability, procurement and build time had to be considered with each design iteration. A simple system of column and ties was devised to best balance these constraints and project requirements.

The steel ties that connect the column heads together act predominantly in tension, tying the Pavilion down to anchor points in each of the three corners, with bracing elements creating a stiffening ‘hem’ around the Pavilion perimeter. The stone is supported by a steel mesh that spans between the ties, forming a basket. The relationship between the ties and the mesh was carefully tuned to ensure that their strain and deformation is visible in the finished work, emphasising the heavy mass of the stone juxtaposed with the very slender columns, whilst also ensuring that it would function as a traditional tiled roof would; providing shelter and protection from the elements.

To create a seamless connection with the concrete floor, the columns are rooted to the slab without the use of a traditional baseplate. Instead, the columns feature an internal dowel fixed to the slab, spreading the loads from the stone roof across the Gallery’s lawn.
The combination of complex structural engineering analysis, a completely free-form geometry, digitally fabricated steelwork and traditional hand-laid stone meant that some design details could only be confirmed after the build commenced - placing even more pressure on the delivery programme. Despite this and the logistical challenges of working with an architect on the other side of the world, the team worked tirelessly to produce a dramatic and unique design.

Michael Orr, Principle Engineer at AECOM
SERPENTINE PAVILION 2019: SPONSORS AND SUPPORTERS

The Serpentine Pavilion is, both artistically and financially, a hugely ambitious undertaking. The construction and realisation of the Pavilion relies entirely on the support of a significant group of companies and individuals.

Serpentine Pavilion 2019 supported by

Goldman Sachs

The Goldman Sachs Group, Inc. is a leading global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. Founded in 1869, the firm is headquartered in New York and maintains offices in all major financial centres around the world. goldmansachs.com

Therme Group™

Therme Group™ is a leading global technology company and integrator of health, sustainability and recreation concepts focused on revolutionizing the wellbeing industry. Therme Group™ supports the art and architecture community through Therme Art Program, an initiative dedicated to the realization of large-scale, long-term art projects for Therme Group™s esteemed thermal baths. Therme Art Program works with internationally renowned artists and architects, as well as emerging talents, to commission and develop site-specific artistic projects that challenge the limitations of conventional exhibition spaces and redefine contemporary art viewing.

Technical Consultant

David Glover

David Glover brings a unique continuity and design expertise to this year's Serpentine Pavilion. Having worked on eleven of the last fourteen Pavilions and the 2016 Summer Houses, Glover has a singular understanding of how the Serpentine's and The Royal Parks's briefs combine with the need to design and construct the Pavilion within six months of being commissioned. This year's Serpentine Pavilion has successfully used everyday materials and
techniques in innovative and creative ways that challenge our perception of architecture.
